Feedback Session

8 short scenarios · ~45 minutes · no right or
wrong answers

Welcome — read this first

Thank you for taking part. This session should take around 45 minutes.

What we're doing

We'll show you 8 short scenarios — real situations that come up in a dealership inbox. For each one, we want to understand how you'd naturally approach it. We're testing the design, not you.

One rule

Think out loud. As you read each scenario and work through it, speak or type whatever is going through your mind — what you're looking at, what's confusing, what makes sense. The thinking is more useful to us than the answer.

You'll see three design versions

Each scenario will show you the same inbox in three slightly different layouts — Option A, Option B, and Option C. You'll be able to work with all three. At the end we'll ask which felt most natural for how you work.

No wrong answers

If something is confusing, that's useful feedback — not a mistake. If you're not sure what to do, that's exactly what we want to know.

Ready? Turn the page when you're set.

Scenario 1 of 8

It's Monday morning. You've just logged in. There are 22 conversations in the inbox — you haven't seen any of them before. Without opening any conversation, tell us which 3 you'd work on first and why. Then go ahead and start on the most urgent one.

As you go: speak or type your thoughts out loud. There are no right or wrong answers — we want to understand how you think, not test your knowledge.

When you're done: Was there anything on the card you didn't understand or weren't sure about?

Scenario 2 of 8

You're mid-shift. There's a mix of conversations in the inbox — some resolved, some still active. Nobody has flagged anything to you. Scan the list and tell us if there's any customer you think might be angry or at risk of leaving a bad review. Point to them and tell us what made you pick that card.

As you go: speak or type your thoughts out loud. There are no right or wrong answers — we want to understand how you think, not test your knowledge.

When you're done: Was there anything on the card you didn't understand or weren't sure about?

Scenario 3 of 8

AI handled a call about a warranty claim and passed it to a service advisor 2 hours ago. The advisor didn't pick up. The customer is still waiting. Find that conversation. Before opening it, tell us: what state is it in, who owns it, and how long has it been waiting? Then tell us what you'd do next.

As you go: speak or type your thoughts out loud. There are no right or wrong answers — we want to understand how you think, not test your knowledge.

When you're done: Was there anything on the card you didn't understand or weren't sure about?

Scenario 4 of 8

Amanda AI handled an inbound call and flagged it to you. You're about to call the customer back right now. Using only what the card shows you in the list — without opening the conversation — tell us everything you know about what this customer wants and what AI already did.

As you go: speak or type your thoughts out loud. There are no right or wrong answers — we want to understand how you think, not test your knowledge.

When you're done: Was there anything on the card you didn't understand or weren't sure about?

Scenario 5 of 8

You have 38 conversations across all channels. Some are done. Some still need a person to act on them. You need to give your team a clear list of what to work on. Get to a view that shows only the conversations that still need human attention. Walk us through exactly what you did and why.

As you go: speak or type your thoughts out loud. There are no right or wrong answers — we want to understand how you think, not test your knowledge.

When you're done: Was there anything on the card you didn't understand or weren't sure about?

Scenario 6 of 8

You were with a floor customer for 40 minutes. You come back to your desk and want to quickly see what came in while you were busy. Find any conversations with new messages you haven't seen yet. Pick the most important one to reply to first and tell us why you chose it over the others.

As you go: speak or type your thoughts out loud. There are no right or wrong answers — we want to understand how you think, not test your knowledge.

When you're done: Was there anything on the card you didn't understand or weren't sure about?

Scenario 7 of 8

You just called a customer back, confirmed their appointment, and the issue is fully resolved. Nothing more needs to happen on this conversation. Close this conversation out so your manager can see it's been handled. Then tell us what you expect the card to look like after you do that.

As you go: speak or type your thoughts out loud. There are no right or wrong answers — we want to understand how you think, not test your knowledge.

When you're done: Was there anything on the card you didn't understand or weren't sure about?

Scenario 8 of 8

Your dealer principal wants to know if the AI investment is paying off. You have 5 minutes to put together an answer. Using only what's visible in the inbox today, tell us what you can confidently say about how AI has been performing. Then tell us the biggest thing you can't answer from this view.

As you go: speak or type your thoughts out loud. There are no right or wrong answers — we want to understand how you think, not test your knowledge.

When you're done: Was there anything on the card you didn't understand or weren't sure about?

Final questions

Five questions to finish. These take about 5 minutes. Write or speak your answers.

Q1

On a scale of 1–7, how easy was it to understand the state of a conversation without opening it?

1 = very difficult · 7 = very easy

☐
1

☐
2

Q2

Which design — Option A, B, or C — felt most like how you actually work day to day? Why?

Choose one and explain in a sentence or two

Q3

Was there anything in the design that felt confusing or out of place?

Open answer — be as specific as you can

Q4

If you could change one thing about what

you see on a conversation card before opening it, what would it be?

Open answer

Q5

In your current job, what's the one thing you most often miss because there are too many conversations to check? Did any of these designs help with that?

Open answer

That's everything — thank you.

Your feedback directly shapes what we build. We appreciate your time.
